ABSTRACT

The research purposes to study the administration and support of police operation of THE COMMISSION OF VERSEEING AND FOLLOWING-UP POLICE ADMINISTRATION in several areas of Bangkok Metropolis. The sample is the amount of policemen who have worked under the command of METROPOLITAN POLICE BUREAU. Data collection is divided into 2 parts; 427 people of questionnaire and 9 people of interview by using SPSS statistical computer program. Statistics used includes values; Percentage, Mean, Standard deviation, Chi-Square Statistics, and f-test (One way ANNOVA).

The study found that THE COMMISSION OF VERSEEING AND FOLLOWING-UP POLICE ADMINISTRATION in Bangkok Metropolis operates in high level. The administration of examination and following up is highest, and the administration of complaint case is lowest. Mean of the administration in each area is different; the internal area is highest followed with the mid-area and external area respectively. It corresponds to the concept of the ecology of criminal system. The administration of support of police operation is also different in each area; the internal area is supported highest following with the mid-area and external area respectively. However, all area is supported in sections of law enforcement in highest level, and investigation in lowest level. Besides, the administration and support of police operation of THE COMMISSION OF VERSEEING AND FOLLOWING-UP POLICE ADMINISTRATION correspond to each other.
