### **ABSTRACT**

This research aims to amend the law of the organization that controls and reviews the constitutionality of legal enactment. This study uses the Qualitative Research Methodology that consists of documentary research and in-depth interview.

This study found that the law of the organization that controls and reviews the constitutionality of legal enactment has three problems which are a form of organization, a scope of authority and procedure. These aforementioned lead to the amendment to the Constitution of Thailand B.E. 2560 and the organic act on constitutional procedural act B.E. 2561. People should be allowed to participate in the recruiting of the Constitutional Court Judges; the right to file a lawsuit directly to the constitutional court without the Ombudsman approval, and the authority to review only the constitutionality of the provisions of the law.

The research has provided the prototype to the amendment to the Constitution of Thailand B.E. 2560 and the organic act on constitutional procedural act BE 2561

Recommendations for the further study should be “Organization and Process of Controlling the Constitutional Court”.
