ABSTRACT

The objective of the research is to study and analyze the situation of problems and impacts of Songkhla Lake Basin. The study basing on Basin area management according to foreign laws and Thai laws and Songkhla Lake Basin Management Model in order to create a local regulation model on Songkhla Lake Basin Management. The research methodology is qualitative research consisting of Documentary research; In-depth interview; Focus group; Participatory Design, Co-design; and Hearing.

The research found out that the problems and obstacles in the management of Songkhla Lake Basin is too many agencies without local administrative organization involved in management. The local regulation provides for the management composes of 20 sections divided into 5 chapters. First chapter is General provisions. Second chapter is Local commission on Songkhla Lake Basin Management. Third chapter is the authority of the Local commission on Songkhla Lake Basin Management. Fourth chapter is Rights and Duties of the members of the Songkhla Lake Basin local network. Fifth chapter is Local Fund of Songkhla Lake Basin. This local regulation will cause the management of Songkhla Lake Basin more effectively.

Research recommended to issue local regulation in accordance with the model of Songkhla Lake Basin Management for the implementation of local administrative organization. Further research recommended is “A research on local regulation model for the designation of food security areas in the Watershed”.
