ABSTRACT

This research aimed to study and research on the damaged person in environmental cases. The research uses a qualitative research methodology. Documentary research; concept analysis related principles and theories

The research found out that the damaged person in environmental cases consisting of 2 types, i.e, direct impact damaged person and indirect impact damaged person. The direct impact damage person ingested pollution into body and damaged occurred, the indirect impact damaged person will accumulate pollution into bodies which will take a few years to appear the symptom According to Thai law accept only damaged person at the time of issuing litigation. Thai law provides 2 years for the appearance of damaged to file for compensation. Therefore, indirect impact damaged person in environmental cases will deprive the right of indirect damaged person.

The research suggested that the definition of the damaged person in environmental cases should added by including direct impact damaged person and indirect impact damaged person. Adding provision on liability of indirect impact damaged person as well, in the Enhancement and Conservation of National Environmental Quality Act, 1992.
